## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

- Claim 1. (Currently Amended) A lathering personal cleansing composition comprising:
  - a. from about 0.05% to about 5.0% alkyl ethoxylated polymer;
  - b. from about 0.1% to about 5% cross-linked acid co-polymer;
  - c. from about 0.1% to about 30% particulate material selected from the group consisting of a cleansing agent, exfoliating agent and mixtures thereof; and
  - d. from about 4% to about 30% lathering surfactant comprising a mixture of anionic lathering surfactants, and one of amphoteric lathering surfactants[[.]] and zwitterionic lathering surfactants, wherein the lathering surfactant has a ratio by weight of anionic lathering surfactant to amphoteric lathering and zwitterionic lathering surfactants from about 4.541.1.11 to about 4.311.5;

wherein the Average Lather Volume of said lathering personal cleansing composition is greater than or equal to about 15 ml; and

wherein the lathering personal cleansing composition has a Brookfield Yield Value greater than 50 dyn/cm<sup>2</sup>.

- Claim 2. (Original) The composition according to claim 1 wherein the alkyl ethoxylated polymer is at a level from about 0.1% to about 2.0% of the composition.
- Claim 3. (Previously Presented) The composition according to claim 1 wherein the alkyl ethoxylated polymer comprises at least one alkyl substitution selected from the group consisting of mono-alkyl, di-alkyl, tri-alkyl, tetra-alkyl and all combinations thereof.

Customer No. 23368

 $Claim\ 4.\ (Previously\ Presented)\ The\ composition\ according\ to\ claim\ 1\ wherein\ the\ alkyl$ 

ethoxylated polymer comprises at least one alkyl substitution selected from the group

consisting of di-alkyl, tri-alkyl- and combinations thereof.

Claim 5. (Previously Presented) The composition of claim 3 wherein the alkyl substitution is

selected from the group consisting of saturated, unsaturated, branched, linear alkyl groups  $% \left\{ 1\right\} =\left\{ 1\right\}$ 

and combinations thereof having from about 12 to about 50 carbon atoms.

Claim 6. (Previously Presented) The composition of claim 4 wherein the alkyl ethoxylated

polymer comprises greater than 40 moles of ethylene oxide.

Claim 7 and Claim 8. (Canceled).

Claim 9. (Previously Presented) The composition according to claim 1 wherein the cross-linked

acid co-polymer comprises at least one alkali-swellable acrylate co-polymer.

Claim 10-Claim 14. (Canceled).

Claim 15. (Previously Presented) The composition according to claim 1 wherein the Average

Lather Volume of the composition is greater than or equal to about 20 ml.

Claim 16. (Original) The composition according to claim 15 wherein the lathering surfactant is at

a level from about 6% to about 25% by weight of the composition.

Claim 17. (Canceled)

Claim 18. (Original) The composition according to claim 1 wherein the anionic lathering

surfactants are selected from the group consisting of sarcosinates, sulfates, sulfonates,

isethionates, taurates, phosphates, lactylates, glutamates, and mixtures thereof.

Claim 19. (Previously Presented) The composition according to claim 1 wherein the composition has a Brookfield Yield Value greater than about 75 dyn/cm².

Claim 20 and Claim 21. (Canceled)
